Motion PSH-A — Multi-jurisdictional encampment task force: The Board of the Studio City Neighborhood Council (SCNC) requests that Councilmember Raman and Councilmember Nazarian support the creation of a multi-jurisdictional task force in CD 2 and CD4 to address problematic homeless encampments. Such a task force is needed because encampments often exist in one

jurisdiction, e.g., Los Angeles County property, yet have spill-over effects on City of Los Angeles property, or vice versa. Coordination of bordering jurisdictions is essential to address and manage holistically law enforcement, outreach, public/mental health, and sanitation aspects of homelessness across political boundaries. Such a task force would be composed of LAPD/LASD, CIRCLE/County Public Health, and LASAN elements as needed. A collective approach would rapidly provide both necessary resources and assistance to the homeless and prevent the existence of chronic encampments in our communities.

Motion GAC-A — Attached ADUs and the Baseline Mansionization Ordinance: The Board of the Studio City Neighborhood Council (SCNC) requests Councilmember Adrin Nazarian to make a City Council Motion to stop the practice of developers building single-family homes with attached ADU's and then taking down an interior dividing wall to make the building all one housing unit after the Certificate of Occupancy is issued. Ordinance No. 184802

Motion GAC-B — Building teardowns, setbacks and demolition notice: The Board of the Studio City Neighborhood Council (SCNC) requests Councilmember Adrin Nazarian to make a City Council Motion to stop the practice of developers leaving the tiniest of wall section up after a building teardown in order to bypass updated zoning setback ordinances and the 45-day public notification period required for demolition permits. 50.1% of the original structure should remain in order to bypass these requirements.

Motion GAC-C — LADWP rates, billing and customer programs (CF 26-1504): The Board of the Studio City Neighborhood Council (SCNC) supports Council File 26-1504 to request the to request the Department of Water and Power (LADWP) to report back on:

• Factors that have led to increases in water and electricity rates over the past ten years, since the 2016 rate increases, and a comparison of typical bills in the ten hottest neighborhoods in Los Angeles;

• Options for aligning rate structure to encourage optimal power usage, including timing and location of smart meter installation and shift toward time-of-use metering;

• Reasons why customers whose meters are accessible might receive bills with estimated rather than actual usage, or miss entire billing cycles; how LADWP ensures that in such circumstances actual usage is not billed in a higher rate tier; and how LADWP might proactively inform customers of payment programs;

• Feasibility of detecting anomalous water and/or electricity usage before the end of a billing cycle, and proactively informing customers, and/or allowing customers to receive frequent updates regarding actual utility usage; and

• Programs to assist customers in reducing water and electricity usage, including energy audits and energy-efficiency programs; and options for proactively providing information about these programs to lower-income households or communities, or customers with higher usage

Upon receipt of the report back, the SCNC requests holding off agendizing the report back to the designated City Council Committee(s) and the full City Council for votes for at least 4 weeks to allow this NC and other NC's to review and submit comments based on the report back.

• Projected electric rate increases over the next 5, 10, 15, and 20 years associated with implementation of LA100.

• A detailed breakdown and explanation of all anticipated pass-through charges, fees, surcharges, and infrastructure-related cost recovery mechanisms associated with LA100 implementation.

• Projected average summer electric bill increases by customer category, including:

  ◦ Single-family residential customers

  ◦ Multifamily/apartment customers

  ◦ Commercial customers

  ◦ Industrial customers

• An overview of anticipated capital infrastructure investments associated with LA100, including transmission, distribution, grid modernization, energy storage, wildfire mitigation, and renewable energy procurement costs.

• A detailed outreach and public education strategy to inform ratepayers regarding projected costs, conservation strategies, rebate programs, and available financial assistance programs.

• An analysis of how electrification mandates and increased electric demand may affect overall system reliability and customer costs during peak summer periods.

• Identification of any state or federal funding opportunities that may offset costs to LADWP ratepayers

As well as, providing a comparative analysis between the City's LA100 plan and the requirements of California Senate Bill 100 (SB100), including:

• A summary of the key policy differences between LA100 and SB100.

• Identification of any requirements, timelines, mandates, or implementation strategies contained within LA100 that exceed or accelerate the requirements of SB100.

• An estimate of the additional costs associated with implementation of LA100 beyond those required to comply with SB100 alone.

• A comparative analysis of projected ratepayer impacts under:

  ◦ Full implementation of LA100

  ◦ Compliance with SB100 without additional LA100 requirements

The ordinance should include the following:

• Utilize the California Health and Safety Code Section 1801 definition for Recreational Vehicle.
